

PCX ROX 16R PSU WIRED EXPANDER

Added expansion

Expanding your output capability

Add up to 16 additional relay outputs to the PCX control panels with the PCX 16R PSU.

Complies with EN50131-1

PCX ROX 16R PSU WIRED EXPANDER

Deliver the output the installation needs with the ability to add 16 relay outputs

The ability to add relay outputs (NO or NC) provides greater flexibility and options to any install, adding a multitude of peripherals to deliver the perfectly tailored system.

Adaptable & optimised

- **Know the status with LED indications**

The PCX ROX 16R PSU boasts status LED indications for each output, which makes installation fast and easy.

- **Has its own power with an integrated 2.5A intelligent PSU**

Provides the ability to monitor its own power from the PSU. All connections are automatically made to draw their power from the power supply and it can be used to monitor if there is an issue at that particular point.

- **Wired directly to the RS-485 BUS**

- **Beat the burglar with tamper protection**

This ensures that maximum security is maintained against accidental or malicious tampering of the system, providing that added peace of mind that the system is secure.

Partcode	PCX ROX 16R PSU
Type of Module	
Wired input expander module	x
Two-way wireless input expander module	x
Output expander module	✓
Technical Characteristics	
Wired inputs (NC/DEOL/3-EOL)	x
Outputs	x
Relay outputs	16
Two-way wireless inputs	x
Two-way wireless keyfobs	x
Two-way wireless sirens	x
Plastic housing with tamper protection	x
Metal housing with tamper protection	✓
Integrated power supply	2.5A
Certifications & Warranty	
Electrical conformity	CE
EN50131	Grade 3
Environmental class	II
	x
	Self-certified
Warranty	2 years
