

ENFORCER V10

One panel to suit them all

The easiest installation choice you'll have to make

All the best features of the Enforcer 32WE and Enforcer HomeControl+ panels brought together with the Enforcer V10. Instead of options being black or white, now you can provide any functionality or application with one panel. The Enforcer V10 is changing the game.

ENFORCER V10

Keeping you ahead of the curve with DIGI WIFI included as standard

IP communications and push notifications with smart apps are becoming the norm. So, a DIGI WIFI module* is supplied for free, as standard, with the Enforcer V10 to deliver PyronixCloud and HomeControl+ connectivity and all the benefits they provide.

Safe on the go control & monitoring with the HomeControl+ App & PyronixCloud

- **Complete secure control from anywhere in the world**

The HomeControl+ App and PyronixCloud communications are encrypted to the highest standard, so the user can securely set and unset the system, get system status and receive custom push notifications from any event from anywhere.

- **No on-site IT configuration**

The Enforcer V10 is connected through a cloud server, so there is no need to set up static IP addresses or configure the network connection on site, instead you simply set up an account on PyronixCloud.com.

- **Recurring revenue & retention**

Streams of recurring revenue can be established by offering PyronixCloud management services; managing this or passing access to users. This increases customer retention and makes the system more profitable.

Connect as required with the complete compatibility with all communication options

Whatever the communication need, the Enforcer V10 gives you the option. Simply purchase the option you want and fit it into the panel.

Get to know one & master them all, with fully menu-driven programming

Easily navigate through the menus of the Enforcer V10 with the same uniform menu-driven programming. Simple 'YES/NO' questions allow fast and efficient installing to save both time and money.

Faster installation, less invasion, upsell opportunities & the same superior security with two-way wireless technology

- **No wires, no fuss**

As the system is fully wireless there is no need to run wiring by lifting floorboards or moving furniture, saving you time and money.

Partcode	Enforcer V10 (ENF32UK-WE)
Maximum Inputs	66
-EOL	32 with 4 ZEMs, & 2 on i/O board
-Wireless	64 with 1 EURO-ZEM32-WE
Output Modules	1
Maximum Outputs	38 (3 PGMs on I/O board) and 4 x PGMs on ZEMs
Wireless Bells	2
Set / Unset	Pin, Prox, APP or Keyfob
- Keypad type	LCD Keypad with prox
- Additional Keypads	3 (Including panel)
- Arming Stations	Max 4
- Readers	Max 3

PSU	1A
EN Grade	EN50131-1:2006+A1:2009 EN50131-3:2009 EN50131-6:2008 EN50131-5-3:2005+A1:2008 PD6662:2010 SG 2 EC II

- **One-Push-To-Learn**

A feature in all Enforcer wireless devices that means learning devices onto the system can be done in seconds. Simple one button learning feature for easy installation.

- **Signal Strength Indicators**

Signal Strength Indicators (SSI) in all Enforcer wireless devices allow the positioning of devices during installation, without the need to refer back to the panel.

- **Instant Two-Way Device Control (ITDC)**

No more frustrating sleep timers on detectors with ITDC. This enables the instant wake up and instant sleep of each wireless device on the system to preserve battery power and operability.

**All other communication options, including PSTN (DIGI-1200) are sold separately.*
